

How to Use the Ellipta

Instructions:

1. Check the dose counter to see the number of doses remain in the Ellipta inhaler.
2. Do not shake the inhaler at any time.
3. Slide the cover down until you hear it clicking into place.
4. Breathe out away from the inhaler.
5. Place the mouthpiece in your mouth and close your lips around it to form a good seal.
6. Do not block air vent with your fingers.
7. Breathe in deeply until you have taken a full breath.
8. Remove the inhaler from your mouth.
9. Hold your breath for 5 seconds or as long as comfortable.
10. Exhale slowly through your mouth or nose away from the inhaler.
11. Slide the cover upwards as far as it will go to cover the mouthpiece.
12. Check the number in the dose counter window to see how many doses are left.

Tips:

- Do not open the mouthpiece until you are ready to inhale the dose. If the mouthpiece is closed, the dose is lost.
- Always close the cover after use.
- If you are using this inhaler for a corticosteroid preventer medication, rinse your mouth with water and spit after inhaling the last dose to reduce the risk of side-effects.
